WHAT IS THIS PRODUCT?

Type	Open-ended Tracker Certificate in the form of Ledger-Based Securities ("Registerwertrechte") according to Art. 973d et seqq. Swiss Code of Obligations ("CO") under Swiss law.
Term	This product has no fixed maturity. However, it may be redeemed by the investor or terminated by the Issuer. In case of a termination by the Issuer, the Issuer will notify the investors of the termination at the earliest possible date, in any event no later than 30 business days prior to the termination date.
Objectives	The product is a Tracker Certificate issued as an ERC-20 token. It tracks the price of the iShares \$ Treasury Bond 0-1yr UCITS ETF USD (the "Underlying"). The investment objective of the Underlying is to deliver the return performance of the ICE U.S. Treasury Short Bond Index, less the fees and expenses of the fund. bIB01 is designed to give eligible cryptocurrency market participants regulatory-compliant access to the index' performance, whilst maintaining the benefits of blockchain technology.

- have a minimum investment horizon of the recommended holding period specified below.

WHAT ARE THE RISKS AND WHAT COULD I GET IN RETURN?

RISK INDICATOR

 The risk indicator assumes you keep the product for 3 years. The actual risk can vary significantly if you cash in at an early stage and you may get back less.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 3 out of 7, which is a medium-low risk class. This means the fund has medium-low risk of ups and downs in the product value. The indicator primarily reflects increases and decreases in the assets the product is invested in.

To the extent the currency of the country in which you purchase this product or the account to which payments on this product are credited differs from the product currency, please be aware of the currency risk. You will receive payments in a different currency, so the final return you will get depend on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

This product does not provide any protection from future market performance. You could therefore lose some or all of your investment. If the Issuer is not able to pay you what is owed, you could lose your entire investment.

PERFORMANCE SCENARIOS

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted. The scenarios shown are illustrations based on results from the past and on certain assumptions. The unfavorable, moderate, and favorable scenarios shown are illustrations using the worst, average, and best performance of the product over the last 10 years. Markets could develop very differently in the future.

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back. The stress scenario shows what you might get back in extreme market circumstances.

WHAT HAPPENS IF BACKED ASSETS GMBH IS UNABLE TO PAY OUT?

The product is collateralized through the purchase of the Underlyings. When an investor buys the product, the Issuer uses the proceeds, minus the costs, to finance the purchase of Underlyings. The value of the collateral at any point in time must correspond to the value of the product at that time, calculated accordingly by the Issuer. The investors have a primary claim to the collateral allocated to the specific product.

In addition, the investors have a subordinated claim to the assets of the Issuer after all primary claims have been settled. The product is neither insured nor guaranteed by any government or agency.

WHAT ARE THE COSTS?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

COSTS OVER TIME

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario.
- CHF 10,000 is invested.

	If you exit after 1 year	If you exit after 3 years
Total costs	CHF 48	CHF 66
Annual cost impact (*)	0.49%	0.22% each year

(*) This illustrates how costs reduce your return each year over the holding period. For example, it shows that if you exit at the recommended holding period your average return per year is projected to be 0.76% before costs and 0.54% after costs.

COMPOSITION OF COSTS

One-off costs upon entry or exit		If you exit after 1 year
